PROFILE

Motivated and adaptable Web Development student with experience in both front-end and backend technologies. Proven ability to work independently and as part of a team. Fast learner with strong communication and problem-solving skills. Seeking an internship opportunity to apply my skills and grow professionally in the software development field.

PROGRAM-RELATED SKILLS *or* SUMMARY OF QUALIFICATIONS

- Proficient in **HTML, CSS, JavaScript, React, and Node.js**, gained through academic projects and **self-driven learning**. Include sub-headings if applicable
- Experienced with Git and GitHub for version control and collaboration.
- Strong understanding of responsive design and **UI/UX** principles from coursework and freelance work.
- Excellent communication and teamwork skills developed through part-time jobs and collaborative assignments.
- Quickly adapt to new tools and frameworks, recently learned Tailwind CSS and integrated it into a personal project.
- Familiar with Agile methodologies from class simulations.

EDUCATION

Diploma in Web Development and Internet Applications Algonquin College – Ottawa, ON GPA Level 1: 3.74	2025– 2026
Bachelor's in Telecommunications Université Abderrahmane Mira of Bejaia – Bejaia, Algeria	2020– 2023

ACADEMIC PROJECTS

AI Photo Enhancement App	Juin-2025– September-2025
---------------------------------	----------------------------------

Web Development Program, Ottawa, ON

- Created a React-based web app for enhancing and transforming photos using AI tools.
- Integrated third-party APIs and cloud services for image processing.
- Practiced Git version control and teamwork through GitHub.
- Designed with a focus on accessibility and mobile responsiveness.

Pokédex Web App	Mars-2025–Mars-2025
------------------------	----------------------------

Web Development Program, Ottawa, ON

- Developed an interactive Pokédex using **HTML, CSS, JavaScript** and the **PokéAPI**
- Implemented dynamic UI, responsive design, and search functionality
- Learned API integration, DOM manipulation, and JavaScript debugging

Network Automation Web Platform –Candela	2023–2024
---	------------------

Network University Project (Université Abderrahmane Mira of Bejaia)

- Built a web app using **React and Flask** to configure routers and switches remotely
- Integrated **Netmiko** to automate CLI interactions with networking devices
- Simulated topologies using **GNS3**; emphasized ease of use and automation

Network Vulnerability Research & Simulation

2022–2023

Bachelor's Capstone Project (Université Abderrahmane Mira of Bejaia)

- Investigated critical vulnerabilities in Layer 2 (VLAN Hopping, STP, ARP Spoofing) and Firewalls
- Demonstrated real-world **zero-day CVEs** using **Kali Linux**, **Burp Suite**, and **Cisco tools**
- Simulated and documented multiple attacks and countermeasures

WORK EXPERIENCE

Trainee Network Technician / Algeria Telecom

2022–2023

Algerie Telecom – Bejaia, Algeria

- Gained hands-on experience in the installation, configuration, and maintenance of optical fiber networks.
- Assisted in the setup and troubleshooting of fiber optic cables, ensuring high-speed and reliable internet connections.
- Worked with specialized tools and equipment for fiber splicing, testing, and performance monitoring.
- Collaborated with senior technicians to optimize the network's performance and resolve connectivity issues.

CERTIFICATIONS

- Python Programming – From Basics to Advanced (2021)
- Adobe Photoshop – Photo Editing (2021)
- AI in the Classroom – Conceptual Understanding (2021)
